

CARDINAL ENERGY CENTER

CLIENT - American Electric Power (AEP)

LOCATION - Brilliant, OH

DESCRIPTION

Matrix NAC, working as a subcontractor for Black & Veatch Corporation, was the general contractor on American Electric Power Company's Cardinal Energy Center in Brilliant, Ohio.

The project scope consisted of retrofitting units no. 1 and 2 with flue gas desulphurization ductwork (FGD) and its support steel structures, structural steel buildings and utility racks, and miscellaneous rough-setting of process equipment.

Matrix NAC rigged and set a variety of ductwork, filters, limestone silos, dust collectors, and belt feeders as well as erected more than 3,670 tons of structural steel, expending over 160,000 person-hours.

Matrix NAC has a long and successful history as the primary contractor for AEP.

PRINCIPAL FEATURES

- Construction
- Retrofit of 2 units with FGD ductwork
- 3,670 tons of structural steel erected
