

COKE BATTERY REPLACEMENT & BLAST FURNACE REPAIRS

CLIENT - USS Gary Works
LOCATION - Gary, IN
COMPLETED - 2016

DESCRIPTION

Matrix NAC was awarded three projects from USS Gary Works:

No. 2 Coke Battery Thru-Wall Replacement:

This project had 71,000 direct hire hours with 60 employees at peak manpower. The project was completed within six months, and Matrix NAC will have future opportunities for additional thru-wall repairs.

No. 6 Blast Furnace Repairs:

This project was completed with more than 82,000 direct hire hours and 400 employees at peak manpower. The scope included a fixed fee/reimbursable commercial agreement.

No. 8 Blast Furnace Repairs:

This project was completed with more than 230,000 direct hire hours and 450 employees at peak manpower. The scope included a fixed fee/reimbursable commercial agreement and a first skip incline replacement.

PRINCIPAL FEATURES

- Maintenance work included ironworkers on the blast furnace and crane repair
- Boilermaker work included the blast furnace and balance of plant
