

# SUBSTATION CIRCUIT BREAKER REPLACEMENT

CLIENT - PPL Corporation

LOCATION - Akron, PA

COMPLETED - 2011

## DESCRIPTION

At the PPL Corporation South Akron Substation, Matrix NAC completed a 230kV circuit breaker replacement project. Working together, a composite crew of linemen and inside wiremen finished the project on time, under budget, and with zero safety incidents. The project included management responsibility for all Matrix NAC's subcontractors and coordination with PPL material management and relay test teams.

Matrix NAC was later awarded additional scope, including a similar 230kV circuit breaker replacement.

## PRINCIPAL FEATURES

- Ensured reliable electric system performance
- Enhanced maintenance practices to preserve T&D reliability
