

POWER DELIVERY

Long considered a contractor of choice to both public and private utilities, Matrix NAC is known for its expertise in power delivery. Built on a long-standing legacy of excellence, Matrix NAC is considered an industry leader in substations, power and industrial electrical work.

Safety. Integrity. Positive relationships. Community involvement. Stewardship. Delivering the best. These core values have forged our lasting reputation for excellence in the industry.

A HIGHER STANDARD IN CONSTRUCTION.

Strength, flexibility, partnership

As the direct hire union subsidiary of Matrix Service Company (Nasdaq: MTRX), Matrix NAC is a top-tier contractor providing procurement, construction, turnaround services, maintenance and repair to North American power, energy and industrial markets. Considered a contractor of choice to public and private utilities and a leader in both power generation and distribution, since inception, Matrix NAC has grown organically and through acquisition. Today we enjoy a proud heritage in the power industry that reaches as far back as 1919.

Our proven commitment to safety, efficiency, and quality has been earned by working hand-in-hand with our customers to identify and implement effective solutions, ensure alignment on project goals and expectations, and complete our work safely, on time and on budget.

Substations

- Construction services
- Maintenance services
- Gas Insulated Substations (GIS)
- Green-field facilities
- Underground work and foundation installations
- High voltage structure erection
- Power, secondary and control wiring
- Hauling and setting of major substation components
- Transformer installation
- Switchgear, including gas-insulated switches
- Static VAR compensators
- ADSS/single mode fusion splicing/fiber optic enclosures
- Security

Transmission & Distribution

- Construction of overhead and underground lines
- Wood and steel pole erection and replacement
- Steel lattice tower erection
- Equipment installations, replacement and upgrades
- Line relocation and re-conductoring

Storm & Emergency Response

- 24/7 availability of experienced line crews and team leaders
- Utility certifications to speed work

Power Generation (Fossil/Nuclear) / Industrial

- Electrical, instrumentation and controls installations/modifications
- Extended Power Uprate (EPU), high voltage installations
- Main Power Transformer (MPT) replacements
- Digital control upgrades
- Process computer installations and upgrades
- Site security/cameras/card access/gate security installations and upgrades
- Single mode/multi-mode fiber optic fusion splicing, terminations and OTDR and power meter testing
- Electrical/I&C personnel support and outage staff augmentation
- CAT 6 data cabling systems and WAP installation
- Outage planning and execution
