

4,000 MW COAL-FIRED POWER PLANT EPSCA

CLIENT - Ontario Power Generation
LOCATION - Canada
COMPLETED - 2012 through 2015

DESCRIPTION

Matrix NAC contracted for a single source construction service agreement for all maintenance and capital projects under an EPSCA agreement from 2005 through 2012 at the OPG Nanticoke G.S. coal-fired power plant.

The EPSCA agreement was assessed under a structured performance scorecard on attributes consisting of safety, environment & quality performance, scope control, schedule adherence, interface effectiveness, budget adherence, contingency plan effectiveness, management, and sub-contractor management.

Examples of projects include: various capital projects, regular outage work including major boiler repairs (units 1-8), condenser retube (12,522 tubes), high-energy piping and feedwater system repairs, precipitator upgrade (unit 6), etc.

PRINCIPAL FEATURES

- 6-year service agreement from 2005 to 2012
- Project examples include:
 - Various multi-trade capital projects throughout facility
 - Regular outage work, including major boiler repairs
 - Condenser retube - 12,522 tubes
 - High-energy piping and feedwater system repairs
 - Precipitator upgrade

1.3M 1.3 million person-hours without a lost-time incident (LTI)
