TURNKEY TANK MAINTENANCE & REPAIR SERVICE PROGRAM

CLIENT - Irving Oil Ltd.

LOCATION - Saint John, New Brunswick, Canada

COMPLETED - 2005-2014

DESCRIPTION

Matrix NAC was contracted by Irving Oil Ltd. to provide on-site maintenance management services at their Saint John, NB, Canada facility. Under the maintenance contract terms, Matrix provided all maintenance services including management, safety, engineering, procurement, fabrication, and labor related to the refinery above-ground storage tanks and Canaport facility. Initially a 2-year contract, the agreement was extended to a total of 9-years.

Matrix was responsible for all tank repairs and engineering, including any recommendations for standards within the refinery. Matrix hired and managed union personnel to perform all repairs - including boilermakers, labor, and pipefitters, and subcontracted work (cleaning, inspections, painting, and calibrations).

Matrix provided daily crew safety briefings, weekly inspections, and reports with recommendations, as well as all safety training for employees and subcontractors.

Matrix oversaw all program costs, including control and reporting, providing weekly and monthly reports on individual tank cost and total program cost. Yearly budgets and schedules were prepared and submitted by Matrix to Irving Oil's senior management. Matrix also provided all accounts receivable and payable, on-site.

PRINCIPLE FEATURES

- Scope development and cost estimates
- Tank isolation and blinding
- Tank cleaning / degassing (Matrix & 3rd party crews)
