

HYDROGEN CAPABILITIES

Leveraging our extensive engineering and construction experience in gas processing, liquefaction, pressurized and cryogenic storage of hydrogen, Matrix is well-positioned and experienced to be your partner in the realization of a carbonless energy source: hydrogen (H₂).

Safety. Integrity. Positive relationships. Stewardship. Delivering the best. These core values have forged our reputation for excellence.

A HIGHER STANDARD IN CLEAN ENERGY

YOUR CLEAN ENERGY PARTNER

A huge advantage of choosing Matrix NAC for your hydrogen projects is our capability of executing projects on an EPC basis with our own US-based direct to hire construction teams.

Services

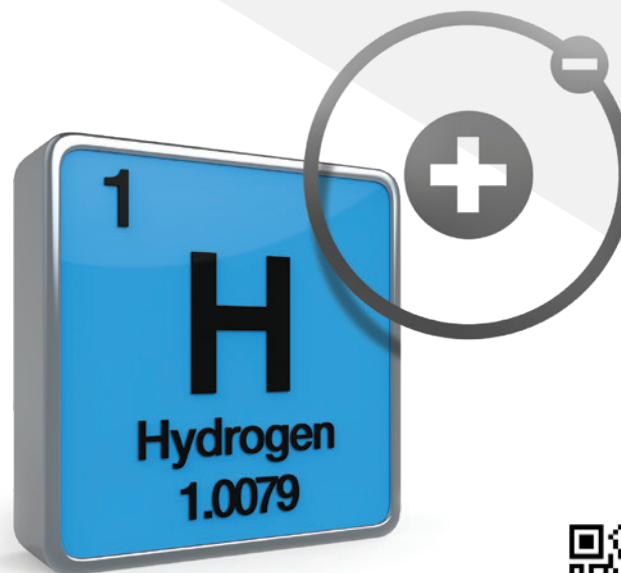

- Conceptual design and feasibility studies
- Front End Engineering and Design (FEED)
- Detailed design
- Engineering, procurement, and construction (EPC)
- General contractor
- Integrator of production, liquefaction, and fueling technologies

Typical Project Scopes

- Liquid hydrogen sphere design, fabrication, and erection
- Hydrogen liquefaction, storage, and distribution facility integration and installation
- Electrolyzer integration and installation
- Hydrogen production facility integration and installation
- Steam Methane Reformer construction
- Hydrogen plant design
- Carbon capture equipment fabrication and installation
- Hydrogen-rich off-gas clean-up, compression, and distribution facility integration and installation

Consumer & Production Facilities

- Transportation and mobility applications
- Ammonia production
- Methanol production
- Biofuels
- Power generation
- Steel, glass, and aluminum manufacturing
- Refining and petrochemicals
