

POWER STATION HRSG REPAIRS

CLIENT - UGI Energy Services
LOCATION - Hunlock Creek, PA
COMPLETED - 2012

DESCRIPTION

Following an over-pressurization event, Matrix NAC evaluated and repaired Unit #6 Heat Recovery Steam Generator (HRSG).

Matrix NAC performed engineering with Stantec, project tracking, procurement, subcontracting, construction, and start-up.

Matrix NAC completed the demolition and replacement to the majority of the boiler and Selective Catalytic Reduction (SCR) modules.

PRINCIPAL FEATURES

- Provided engineering, procurement, and construction (EPC)
- Procured HRSG replacement modules from Victory
- Procured SCR modules
